Application/Control Number: 10/527,045

Art Unit: 1712

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9,19-34, and 40, drawn to a method of making an elastic material.

Group II, claim(s) 10-18, 35-39, drawn to a hose construction having a property that is not necessarily possessed only by the elastic material contemplated in the method claims.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features. In the Examiner's judgement based on the description of Applicant's invention, it seems that the particular combination of materials outlined in the method claims is what Applicant regards as their invention. The claims of group II, on the other hand, claim a product in terms of its properties. While it is ostensibly true that the composition mentioned in the method claims adheres to this property limitation, it should not be assumed that there aren't a plurality of hoses having a two layer construction that possess the claimed properties despite being manufactured from different materials.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

The three permutations of the compatibilizer (c) outlined in the method claims.

Also, within the three broader categories of compatibilizer are mentioned several unrelated embodiments from which Applicant should also choose. For instance, were Applicant to select compatibilizer (i) for prosecution, they are then expected to select

Art Unit: 1712

from the members of the genus that is a compound having a molecular weight of less than 800 that contains at least two functional groups. The Examiner appreciates that the functional groups need not be the same and, thus, Applicant's election might be, for example, a compound bearing epoxy groups and ethylenically unsaturated groups.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner: all claims except 7 and 25 embrace the utilization of any of the three compatibilizers. That is to say, every claim but claims 7 and 25 would be subject to examination for any elected species of compatibilizer except an expoy-functional silicon. Should Applicant elect the epoxy-functional silicone, all of claims 1-9, 19-34, and 40 would be considered as to their patentability.

The following claim(s) are generic: 1, 19, and 40...

Application/Control Number: 10/527,045

Art Unit: 1712

A telephone call was made to Mary Bonzagni on June 1, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Application/Control Number: 10/527,045 Page 5

Art Unit: 1712

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc S. Zimmer whose telephone number is 571-272-1096. The examiner can normally be reached on Monday-Friday 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on 571-272-1302. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
